DETAILED ACTION

This action is responsive to Applicant's communication filed 10/10/2007.

Claims 4-5, 12-13 have been cancelled.

Claims 1-3, 6-11, 14-15 are pending.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-3, 6-11, 14-15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed language is directed to a series of methods directed towards determining, simulating, and registering of hyper/hypometabolic cortical areas and does not produce a useful, concrete, or tangible result and is hence held to be non-statutory subject matter.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach nor fairly suggest simulating a field distribution relative to a position of a stimulator and determining a stimulation area for the stimulator relative to a position of the stimulator as well as navigationally registering the stimulation are of the stimulator.
